1. Overview

This specification defines the APIs and features that Crosswalk implements and supports in the Tizen 3.0 IVI release, 2014. These implemented features MUST be implemented by Tizen Compliant IVI solutions.

Tizen is a registered trademark of the Linux Foundation, which controls the usage of the brand and trademark. Permission to use the Tizen trademark in conjunction with any product is dependent on compliance with the requirements of this specification.

2. APIs

The following section defines APIs supported by Crosswalk (version 11) for Tizen 3.0 IVI.

The “Maturity” column indicates the specification state. The order is as follows (WD is least mature and most likely to change or not become standardized):

- WD: Working draft
- LCWD: Last Call Working Draft
- CR: Candidate Recommendation
- PR: Proposed Recommendation
- REC: W3C Recommendation

More details here: <http://www.w3.org/2005/10/Process-20051014/tr.html#maturity-levels>.

2.1. W3C / HTML5 APIs

These APIs are defined in W3C specifications. Crosswalk support is indicated by the “Supported” column.
